English	Fluent

Education

Univ. of South Carolina

Moore School of Business
PhD, Finance (2021)
Dissertation: "Three Essays on Agency Costs in Corporate Finance". Committee: Eric Powers (Chair), Allen Berger, Hugh Kim, Omrane Guedhami.
GPA: 3.63/4

Indiana State University

Scott College of Business
MBA (2014)
Finance Concentration.
GPA: 3.94/4

King Saud University

College of Business Administration
B.S. - Bus. Admin., 2010
Concentration Track: Financial Management.
GPA: 4/5

Biography

My professional identity is shaped by the dual roles of academic researcher and policy advisor. I currently serve as a Research Advisor to the Capital Market Authority (CMA), where I provide scholarly consultation on the authority’s research agenda, informing policy on market development and risk management. This advisory role complements my work as an Assistant Professor of Finance. My research program focuses on empirical questions in corporate finance, with specific interests in capital and debt maturity structures and corporate governance. A central theme of my recent work involves leveraging computational methods, such as textual analysis of financial disclosures, to re-examine classical corporate theories. I utilize programming languages, such as Python, extensively for these inquiries, and I am committed to advancing the industry’s future through rigorous, data-driven research at the intersection of finance and technology.

Affiliations

Research Advisor

Deanship of Strategy, Research, and International Relations
Capital Market Authority
Riyadh, Saudi Arabia

05/2025 - Present

- Reviewing and evaluating grant proposals submitted under the Authority’s Research Agenda program. Specifically, assessing their strategic alignment, methodological rigor, feasibility, and policy relevance to the Authority’s goals and objectives.
- Developing the capabilities of the research team by mentoring them on best practices in data analysis and policy-focused writing to enhance the overall research output of the Authority.
- Directed the collection and compilation of mutual fund voting records for a 2026 study of voting patterns in Saudi listed companies; analyzed the data in Python to assess the role of institutional investors in corporate governance and supported the team’s reporting to departmental leadership.
- Developed and estimated multiple market-pricing models in 2025 to quantify the effect of corporate violations on stock prices, establishing an evidence-based approach for estimating investor harm and fair compensation.

Assistant Professor of Finance

College of Business Administration
King Saud University
Riyadh, Saudi Arabia

02/2022 - Present

- Instructing and mentoring graduate (MBA, EMBA, and EMF) and senior undergraduate students, delivering a specialized curriculum in Portfolio Management and Investment Analysis to prepare them for careers in high-demand financial sectors.
- Leading departmental quality-assurance and curriculum-development initiatives through committee service, strengthening accreditation documentation, records management, and program coherence.
- Bridging the gap between academia and industry by serving as the key liaison for the Cooperative Training Program, converting employer feedback into concrete faculty recommendations to enhance curriculum.

Consultant

*Malaah Financial Consulting
Riyadh, Saudi Arabia*

09/2023 - 06/2024

- Advised a diverse portfolio of corporate and individual clients on financial strategies to increase shareholder value, optimize capital efficiency, and enhance liquidity.
- Conducted comprehensive financial analysis and capital budgeting assessments to identify opportunities for growth and inform critical investment decisions.
- Built detailed financial models to evaluate company performance and project viability, translating complex data into actionable recommendations for clients.
- Synthesized micro and macroeconomic research to provide data-driven context for financial advice, enabling clients to navigate market volatility.

Research Assistant

*Moore School of Business
University of South Carolina
Columbia, SC, USA*

08/2015 - 12/2020

- Developed and implemented automated scripts in Python (with libraries like BeautifulSoup) to scrape and structure large datasets from various web sources, providing foundational data for multiple faculty research projects.
- Provided critical feedback on draft manuscripts, contributing to the analytical rigor and clarity of academic papers for Prof. Sergey Tsyplakov
- Developed a robust Monte Carlo simulation model that was adopted as a core teaching tool for multiple semesters in the Corporate Finance course.
- Conducted comprehensive literature reviews and performed preliminary data analysis to support the development of faculty research and identify novel areas of inquiry.

AACSB Assistant Coordinator

*Scott College of Business
Indiana State University
Terre Haute, IN, USA*

05/2014 - 05/2015

- Coordinated the collection and verification of all faculty intellectual contributions for the college's five-year AACSB continuous improvement review.
- Managed and audited a comprehensive database of research outputs for over 60 faculty members, ensuring accurate classification and alignment with AACSB standards for faculty sufficiency.
- Served as a key liaison between the Dean's office and faculty, communicating reporting requirements to ensure the timely and accurate submission of all necessary documentation.

University Service & Committee Leadership

Member

*PhD Program Council
College of Business Administration
King Saud University*

Spring 2026 - Present

Oversee doctoral curricula, policies, and program requirements and help establish common admission, test-score, and English-proficiency standards across departments.

Chair

Fall 2025 - Present

Quality and Assurance of Learning (AOL) Committee
Finance Department
King Saud University

Established a centralized repository for departmental records and accreditation evidence; documented AACSB and NCAAA requirements.

Vice Chair

Spring 2025

Exam Committee
College of Business Administration
King Saud University

Oversaw final-examination operations, processed make-up examination requests, and documented academic-integrity violations arising during examinations.

Vice Chair

Fall 2025

Curriculum Committee
Finance Department
King Saud University

Reviewed and revised the bachelor's finance curriculum to eliminate overlapping material and improve course sequencing and program coherence.

Teaching Experience**Valuation, Mergers, and Acquisitions (EMBA523)**

2026

Executive Masters in Business Administration (EMBA)
College of Business Administration
King Saud University

This course prepares executives to lead complex M&A and restructuring transactions, moving beyond technical modeling to strategic deal design and negotiation. Participants will learn to translate valuation outputs, including sensitivity analysis and bid ceilings, into critical managerial decisions regarding financing mix, risk allocation, and post-merger execution.

Corporate Finance (FIN501)

2025

Masters in Business Administration (MBA)
College of Business Administration
King Saud University

This course provides a rigorous and practical introduction to corporate finance, using valuation as the organizing lens for investment and financing decisions. Graduate students are expected to learn capital budgeting, risk & return, and the cost of capital, then apply them to choices about capital structure, payout policy, and mergers & acquisitions.

Corporate Finance & Modeling (EFIN515)

2025

Executive Masters in Financial Technology
College of Business Administration
King Saud University

This executive-level course provides a practical introduction to the main ideas of corporate finance and their application through financial modeling. Designed for executive FinTech students, the curriculum bridges fundamental theory with modern practice, addressing the critical financial decisions faced by firms in a technologically evolving landscape.

Energy Investment & Finance (ERE522)

2025 - present

Executive Masters in Renewable Energy
College of Engineering
King Saud University

This executive-level course provides a comprehensive introduction to the fundamental financial and investment concepts essential for professionals operating within the dynamic energy sector. The course will equip participants with the analytical tools and frameworks necessary to evaluate, finance, and manage energy investments effectively. Key topics include the analysis of project cash flows, understanding the costs of debt and equity, calculating rates of return and discount rates, and mastering valuation techniques such as Net Present Value (NPV).

Investment Analysis (BA523)

2025

Masters in Business Administration (MBA)
College of Business Administration
King Saud University

The objective of this course is to study theory and empirical evidence relevant for portfolio management. An emphasis is placed on understanding how an investment professional would allocate funds in a hypothetical portfolio. Major topics include estimation of capital market parameters, trade-off between risk and return, optimal portfolio selection, equilibrium asset pricing models, and delegated portfolio management.

Portfolio Theory & Investment Analysis (FIN363)

2022 - present

Bachelors in Business Administration
College of Business Administration
King Saud University

This course is designed to provide a foundation for the fundamental principles related to investments. An emphasis is placed on understanding how an investment professional would allocate funds in a hypothetical portfolio. Topics include trade-off between risk & return, optimal portfolio selection, equilibrium asset pricing models, equity valuation, and fixed-income securities. Among the main objectives of this course is understanding how security markets function, and learning how to develop investment strategies.

Mathematics of Money & Investments (QUAN127)

2022 - 2024

Bachelors in Business Administration
College of Business Administration, Muzahmiyah Campus
King Saud University

This course is designed to strengthen students' understanding of neoclassical theories in finance by introducing the mathematical principles and techniques behind essential concepts; such as compound interest, present value of money, hedging, arbitrage, and pricing financial contracts. By the end of the course, students will understand the mathematical underpinnings of various financial instruments and apply mathematical reasoning to solve practical financial problems.

Investment Analysis & Portfolio Management (FINA469)

Summer 2017 & 2019

Undergraduate Degree in Business Administration
Moore School of Business
University of South Carolina

The course provides an in-depth discussion of fundamental principles related to investment analysis and portfolio management. Topics include investment instruments, portfolio theory, equity valuation, fixed-income securities, and option valuation. Upon the completion of the course, students are expected to understand security market functions, recognize the risk-return trade-off in investments, and able to develop investment strategies. Further, understanding the knowledge covered in the course help students prepare for the CFA exams.

Number of students: 19, Evaluation score: 4.55/5.

Business Statistics I (BUS205)

Fall - 2014

*Undergraduate Degree in Business Administration**Scott College of Business**Indiana State University*

An introductory business statistics course. Topics include graphical concepts, measures of central tendency and dispersion, basic probability concepts, random variables, central limit theorem, and hypothesis testing and confidence intervals. Learning is assisted by statistical software applications. The emphasis is on problem solving for decision making.

Number of students: 30, Evaluation score: 3.77/5.

Working Papers

- Alhudhaif, Eyad. (2021). "The Asymmetry Between Growth Opportunities and Debt Maturity Structure". *Working Paper*. <https://dx.doi.org/10.2139/ssrn.3906487>.
Using the recent public health pandemic (COVID-19) as a laboratory experiment, I find evidence of an asymmetrical relation between a firm's debt maturity structure choice and its growth opportunities. Firms with high pre-pandemic exposure to growth-inducing factors obtained from 10-K filings have increased debt maturity and are more likely to exercise a call on their callable bonds, while firms with high pre-pandemic exposure to growth-reducing factors are null in taking any actions to adjust their debt maturity structure. Further, the increase in debt maturity following exogenous changes in growth opportunities suggests a unique type of change in firms' growth options following the recent pandemic, supporting the arguments proposed by Diamond and He (2014) and Childs, Mauer, and Ott (2005).
- Alhudhaif, Eyad. Berger, Allen. Kim, Hugh. (2021). "Firm Risk Exposure Concentration and Debt Structure Choice". *Working Paper*.
Firms with more risk shifting problems due to the high-risk exposure concentration are likely to include more short-term debt in their capital structures and less covenants in their outstanding bonds. Using a firm's risk exposure concentration derived from the written text in 10-K filings, we find this effect is more pronounced among companies with strong managerial incentive alignment with shareholders. The findings suggest maintaining future investment flexibility is important for firms with high-risk exposure concentration, even at the expense of a higher liquidity risk associated with the use of short-term debt.
- Alhudhaif, Eyad. (2016). "Corporate Payouts Under Economic Policy Uncertainty". *Working Paper*.
Using a sample of all public firms in the U.S. between 1985 and 2015, I examine the relation between firm's payout policy behavior under changes economic policy uncertainties, both total and individual components of payouts; dividends and open market share repurchases. Using the EPU index and its components developed by Baker et al. (2016), I find payout programs tend to respond differently depending on the source of economic uncertainty. A persistent negative relationship exists between the level of uncertainty in government spending (GSU) and firms' average level of dividends, share repurchase, and total payout.

Projects

- Developed an application (**Malaah_app**) for *Malaah Financial Consulting*. The simple program serves as a helpful tool for the employees in the office to determine the appropriate financing products their clients can buy.

Involvements & Awards

- Mentored students in the "Distinguished and Talented Students Program", *King Saud University* (2023)
- APICS Great Lakes District Student Case Competition; ranked 4th, *Indiana State University* (2014)
- Beta Gamma Sigma Award, *Indiana State University* (2014)
- Secretary of the MBA Association, *Indiana State University*, (2013-2015)
- Member of the Association for Operations Management, *University of Indianapolis Student Chapter* (2013)
- Member in the Investment Club, *Indiana State University*, (2013-2014)

- Outstanding Student Award, *University of Washington* (2011)
